Obtaining maximum system performance from a geothermal system is not an easy task. Only design-matched components with an integrated control system will provide optimum system performance. Representatives from **Mulcahy Company/HBX** and **Honeywell** will be show you how you can optimize performance by understanding the following:

**Hydronic**

**HBX Control difference**

**Selecting the right control for the job,**

**Wiring,**

**Control set-up**

**Forced Air**

**Zone control options for forced air,**

**Wi-Fi controls for packaged/split systems**

**Wiring**

**Control set-up**

The program includes lunch and instructional materials and is limited to 30 attendees.
